New Page

How to Create or Amend Policies

If you like to propose a new policy or an amendment to an existing policy, please propose the new policy in the DHO under contributions with a [POLICY] prefix in the title, then publish the policy on this wiki space using the following guidelines:

1. If you need an account to create or edit pages, please contact @JoachimStroh on Discord. You can use your existing Cloudron account to log into this space (ping me if you don't have editor rights).
2. Check if your policy falls under the existing categories that are display in the left navigation. If you need a new category, please let me know and I will create it.
3. Follow the existing document structure from previous proposal, there are some variations depending on the type of proposal.
