

Calendaring and Scheduling

CALENDAR CLEANUP TIME!

We have quite a few Google calendars floating around, and now is a good time to clear those out and move them to the shared Google calendar account at calendar@hypha.earth.

Introduction

<https://www.youtube.com/embed/fEqTCF4jeQg>

So, you want to schedule a Zoom meeting? No problem! However, we have a limited amount of Zoom licenses, so a meeting can only be scheduled as a member of a specific circle in Hypha. Once you have confirmed for which circle the meeting is for, make sure your meeting *does not overlap with existing meetings* (licenses do not allow concurrent meetings).

The embedded calendar below shows times in GMT+0 UTC only. Once you add the calendar to your personal Google calendar, it will convert to your local timezone. To add calendars to your calendar, simply click on the "+" sign at the bottom of the embedded calendar below.

<https://calendar.google.com/calendar/embed?src=6o4hreq9510es3u7u58a2moor8%40group.calendar.google.com&ctz=UTC>

How to create a Zoom meeting

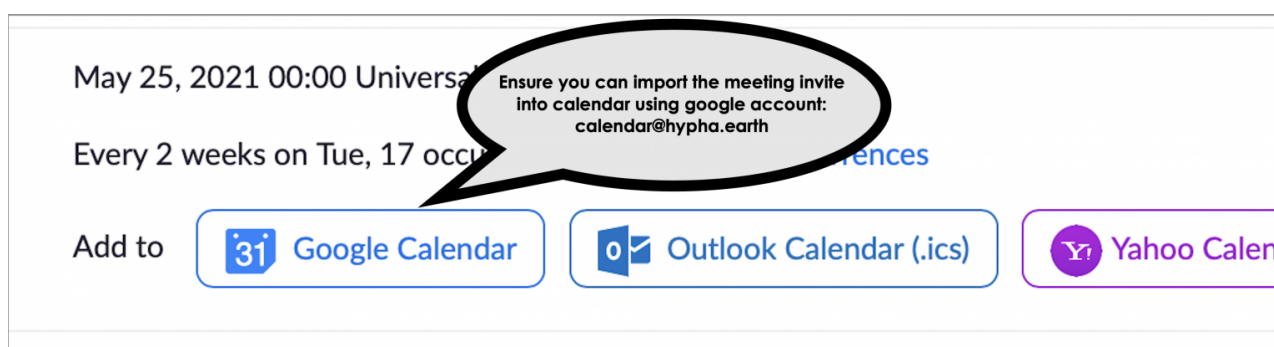

As you recall, every circle has one Zoom license, so it is important to log into Zoom under the correct Zoom account for your circle. All login credentials are maintained in [Locker](#), if you do not have access to Locker, please set up a [Locker](#) account first (see below).

After you have successfully logged into Zoom, you can schedule your meeting. Click on **Meetings** and then on **Schedule a Meeting**. Fill in the form and pay attention to the following fields:

- **Timezone:** Always set this to GMT +0.00 UTC (this will avoid the Daylight Savings Times issue)
- **Recurring meeting:** click on the checkbox, if you repeat this meeting every week (set to weekly and give it an end date or the number of occurrences in the dropdown, eg. "20")
- **Security:** Check "passcode", it will automatically generate a link with the password attached

It is not necessary to have the host be present at the meeting. However, you can share the host code with your team so host features are available (incl. recording and break out sessions). To share the host code, click on **Profile** and scroll down to Host Code.

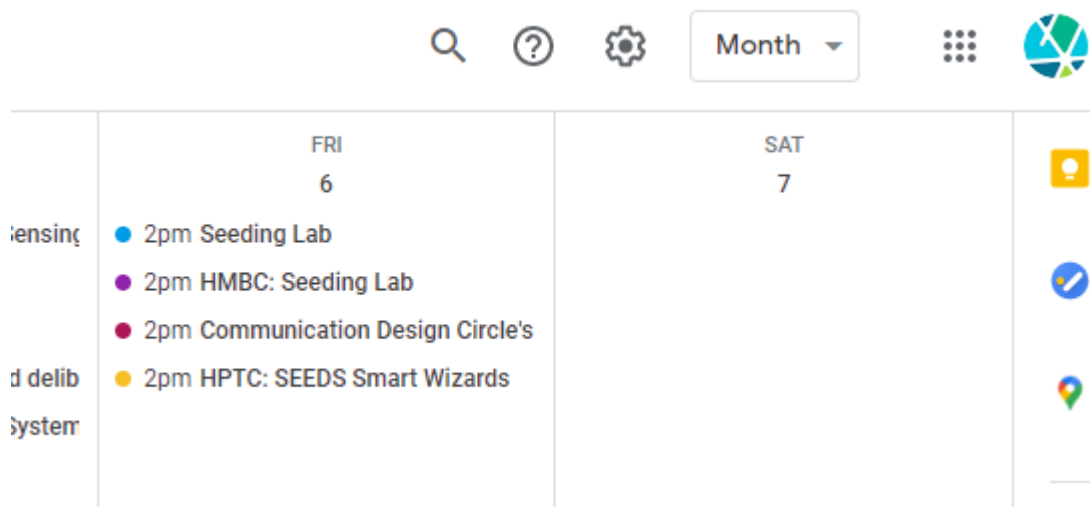

After you have created your meeting, you need to share the invite on the Hypha Google calendar.

The screenshot shows the 'Add to' section of the Zoom meeting creation interface. It includes three calendar options: Google Calendar, Outlook Calendar (.ics), and Yahoo Calen. A callout bubble points to the Google Calendar option, containing the text: 'Ensure you can import the meeting invite into calendar using google account: calendar@hypha.earth'. The meeting details visible are: 'May 25, 2021 00:00 Universal', 'Every 2 weeks on Tue, 17 occurrences', and 'Add to'.

To add the invite to the correct calendar, you need to do two things:

1. If the **Hypha Calendar Account** is NOT open, switch your Google calendar to the **Hypha Calendar Account** by clicking on the avatar on the top right of the calendar view (you will see a Hypha logo like shown below). If you need login credentials to the Hypha calendar Google account, please go to [Locker](#).
2. If the event you scheduled is not open, find and open the invite that you created and switch the calendar to the correct Google CIRCLE calendar (see dropdown next to the calendar icon below).
3. Save the calendar event.

How to set up a Locker account

<https://locker.hypha.earth/> is our secure vault to store all important Hypha usernames and passwords for shared services. Please decide who can access the passwords for Zoom and Google accounts in your circle. While we suggest the Lamp Lighter is a good candidate, it can be anyone in the circle. It is good practice to grant 2-3 people access to the passwords. To request access to Locker and the passwords, please Direct Message one of the maintainers below. You will receive an invitation link to Locker with a list of passwords for Zoom and the Hypha Google calendar account. Locate the Zoom passwords and the Google calendar passwords in the list (see below, each circle has its own login credential).

HPTC

productscircle@hypha.earth

Hypha Global CALENDAR GOOGLE login

calendar@hypha.earth

Click on the link to open the credentials page, e.g. for "HTPC productscircle@hypha.earth" you will see the following screen from where you can copy/paste the username and password:

EDIT ITEM

Name
HPTC

Username
productscircle@hypha.earth

Password
.....

Authenticator Key (TOTP)
.....

26 030 822

For the **Hypha Google calendar** (and other tools that require higher security), you may be prompted for 2-factor authentication (2FA). If this happens, click the copy icon next to the 6-digits counter underneath the password. Use that to paste it into the Google form that is asking for this second protection layer. This is triggered by Google to prevent unauthorized access to accounts and will usually no longer be necessary on subsequent logins.

If the counter is getting close to zero it will change to red. Wait for the next cycle before your copy and paste the 6-digit code.

Frequently Asked Questions

What if I can't log in?

Make sure you have access to **Locker** (see above) and use the correct username and passwords. We have different logins for Google and Zoom, so make sure to pick the right one when you log in. Also note that **Google** is asking (from time to time) for additional verification (called 2-factor authentication) and **Locker** will provide this as well (see screenshot above).

What if I accidentally double schedule?

Our Zoom license does not allow to schedule two meetings at the same time. Make sure you check the current calendars for any overlaps before you schedule your meeting. If for some reason an overlap occurs, Zoom will detect it and close the other meeting once a host has started the new (overlapping) meeting.

What if my calendar isn't syncing with Zoom?

Syncing calendars with Google is a one-way direction - once you have scheduled the meeting and "pushed" it to the Google calendar, it stays there. Any updates in Zoom will NOT be reflected on the Google calendar. To make changes, either edit the Google calendar directly or delete it and push another update to the calendar from Zoom.

What if my circle needs more licenses?

Hypha has a limited amount of licenses available at this time. Unfortunately, we cannot increase the number of licenses but we can revisit this once the current licenses need to be renewed early 2022. The current licenses are maintained [in this file by dStudio](#).

Can we start the meeting without the host?

Yes, you can! In the settings section on Zoom, look for "Allow participants to join before host" and set it to 5 minutes before start time. Additionally, you can share the host key (under your profile settings) and share that with the team members. Keep in mind that you cannot record the meeting and use other host features if no host is present.
